

AUNG THU ZAW

FULLSTACK WEB DEVELOPER

I am a self-taught full-stack web developer with experience in building scalable web applications using Vue.js, Laravel, and Inertia.js. My journey started with online resources like YouTube, Udemy, Laracasts, and Vue Mastery. I have a passion for solving complex problems, optimizing workflows, and improving user experiences. I have experience in leading teams, managing projects using Jira, and deploying applications in staging and production environments.

Skills & Technologies

- **Language:**
 - HTML, CSS, Javascript, Typescript, Php
- **Frontend Frameworks:**
 - Vue Js, Nuxt Js, React Js, Tailwind CSS
- **Backend Frameworks:**
 - Laravel
- **State Management:**
 - Vuex, Pinia
- **Database:**
 - MySQL
- **Cloud & Services:**
 - Firebase, AWS, Digital Ocean
- **Testing & Automation:**
 - Cypress, Pest, Github Actions
- **Development Tools & Utilities:**
 - Git And GitHub, Postman, VS Code
- **Other:**
 - Payment Gateway Integration (Stripe, Omise, Dinger), CI/CD Deployment, Server Maintenance

Work Experience

1. Creative Coder Myanmar

JUNE-2024 - JANUARY-2025

Fullstack Web Developer (Intern & Junior)

At Creative Coder Myanmar, I contributed to multiple projects, managed development, staging, production servers and collaborated with teams to develop and maintain web applications.

Key Projects & Responsibilities:

- **Creative Coder Learning Platform** (VILT Stack)
 - Fixed bugs, handled server maintenance, deployed production updates, and developed new features.
- **Thai Legal Protection Website** (VILT Stack)
 - Maintained and debugged a subscription-based legal service platform with Stripe integration.
 - Migrated data and connected the new system with Omise payment gateway.
 - Conducted Cypress end-to-end testing for payment processing.
 - Managed server maintenance for production, staging, and development environments on DigitalOcean.
- **Online October E-commerce Platform** (VILT Stack)
 - Led UI and backend development for admin and seller management and other functionalities for the control panels.
 - Integrated Dinger payment system (KPay, WavePay) for transactions.
 - Developed B2B e-commerce functionalities and implemented logic.
- **Flood Relief Donation Website** (Vue.js)
 - Built a static donation landing page for a Myanmar-based relief initiative.

Key Achievements:

- Reviewed and approved tech content for the platform.
- Gained experience in payment integrations, including Stripe, Omise, Dinger (Kpay, Wavepay), and multi-currency support for Baht.
- Managed servers, and access keys, and collaborated on Jira ticketing workflows.
- Conducted sprint planning, daily standups, and end-of-day reporting to streamline team progress.
- Enhanced team collaboration and leadership by participating in technical and management meetings.

Education

2020 – PRESENT

SELF-TAUGHT WEB DEVELOPMENT

- Acquired skills through platforms like Udemy, Skillshare, Laracasts, Vue Mastery, and YouTube.
- Self-Taught Developer (No formal degree, learned via online courses and real-world projects)

Language

- Myanmar (Native)
- English (Intermediate)

2. Ardent Tech Solution

FEB-2025 - PRESENT

Fullstack Web Developer (Freelance Mid-Level)

Collaborating with a team of freelance developers on [EM Channel](#), a subscription-based manga platform.

- Developed the admin dashboard using Vue.js, integrating APIs to manage manga content, memberships, and platform functionalities.
- Built Laravel APIs for the admin panel and mobile application.
- Worked with other freelance developers to ensure smooth project execution and maintain best practices.
- Deployed and maintained the server infrastructure on DigitalOcean Droplets.
- Gained experience with Cloudflare CDN for website performance optimization and security enhancements.

My Hand-on Projects (Before First Job)

1. Multi-seller E-commerce Platform

- **Project Summary:** Developed a dynamic e-commerce platform that allows multiple sellers to list and manage their products, while providing customers with a seamless shopping experience.
- **Tech Used:** Inertia Js (Vue + Laravel)
- **Repository:** [Multi-Seller E-commerce Platform](#)

2. Restaurant Food Ordering Website

- **Project Summary:** Created a food ordering website for restaurants, enabling customers to browse menus, place orders, and make payments online.
- **Tech Used:** Vue Js, Laravel, Pinia, Restful Api
- **Repository (Frontend):** [Restaurant Frontend](#)
- **Repository (Backend):** [Restaurant Backend API](#)

3. Online E-learning Platform

- **Project Summary:** Developed an e-learning platform that facilitates online education, offering courses, quizzes, and progress tracking for students.
- **Tech Used:** Nuxt Js, Typescript, Pinia, Laravel, Restful API
- **Repository (Frontend):** [E-Learning Platform with Nuxt](#)
- **Repository (Backend):** [E-Learning Platform Backend API](#)
